ECLIPSES.

There will be four Eclipses this year namely two of the sun and two of the moon in the following order

The first is of the Moon March the 9th nearly visible

The second is of the Sun March the 24 visible

The third is of the Moon Sept the 2 visible 9 at night

The fourth is of the Sun September the 17 invisible

It is very probable some very astonishing events will take place which are at present little dreamed of nor if told would be credited.—Turkey will certainly feel the effects of the evil planets and must fall; and the time of her destruction is nigh she is distracted within and without.—France has suffered much and has still however much to suffer.—Let the dutch also be cautious or they may be duped altho they are themselves crafty. We will the destroying sword return to its scabbard. The harvest will not fail us and I hope will in general be well got in and within the reach of the laborious and industrious. Heaven preserve our favorite country and may every good undertaking prosper, may our nation, our trade and our arts flourish, may she be blessed with peace and happiness while the world endures.

This year I am afraid shews but an unfavourable aspect, the state of human affairs appears but dark and distracted. Many severe losses and dreadful events will take place and it does not appear to be the general wish to promote peace. Some attempts perhaps may be made to promote peace.

Dublin O'Connor.
